

Status of Training in Pediatric Hepatology Across Europe

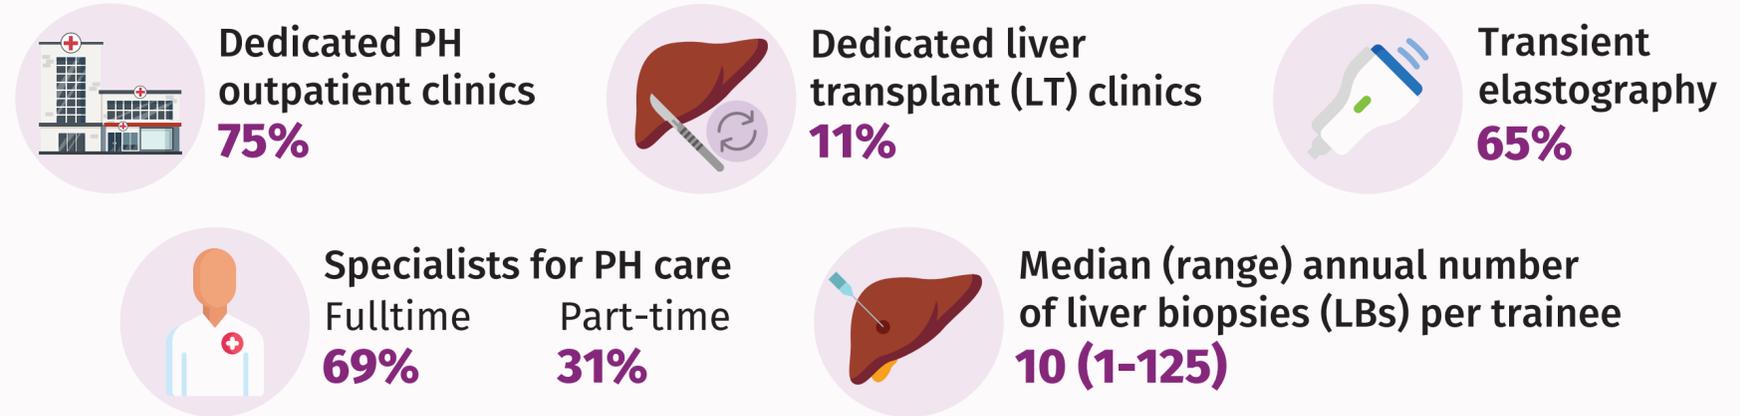

Goal of a training program in pediatric hepatology (PH):

- Provide excellent clinical and research training
- ↳ Make pediatric gastroenterologists independent, qualified, and competent specialists in liver diseases

PH training is, thus, an important part of the pediatric gastroenterology, hepatology, and nutrition (PGHN) curriculum

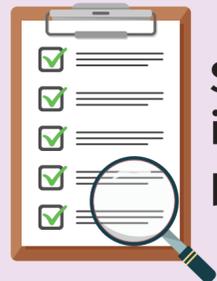

Proportion of PGHN training centers with

≤10 LBs per year are reported by **38%** of training centers
 ≥100 LBs per year are reported by **7%** (all PH and LT centers)

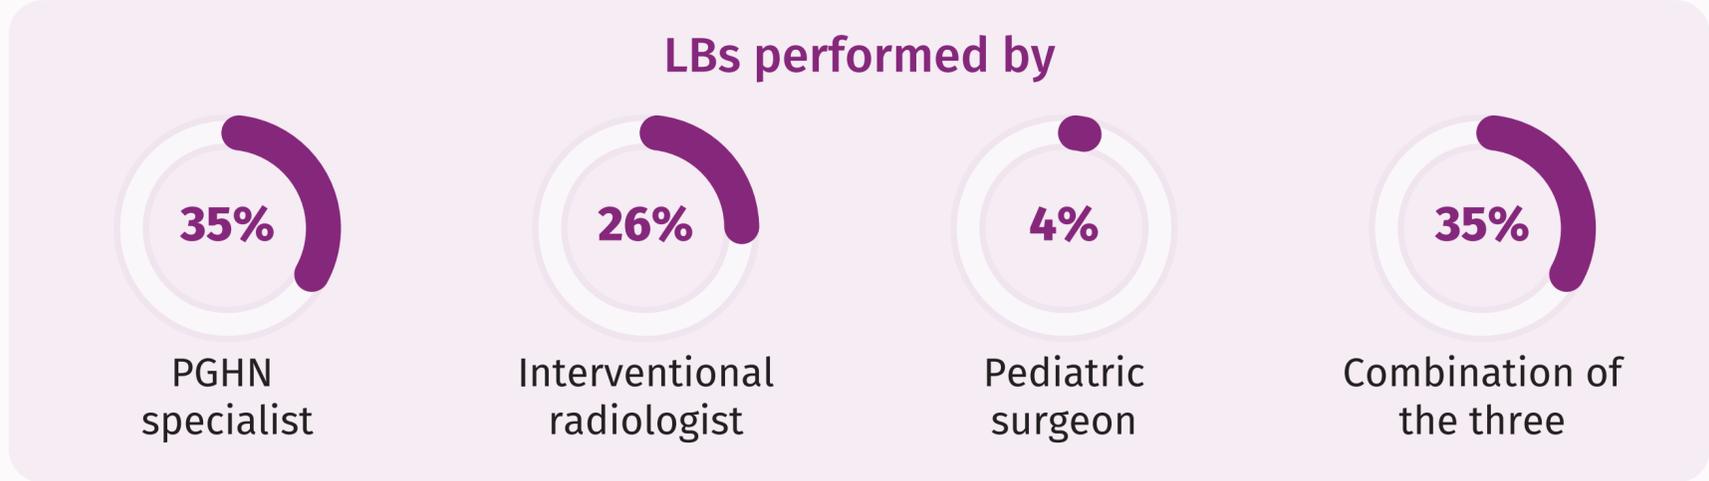

2016–2019

Survey on PH-related infrastructure, staff, and procedural volumes

100 European PGHN training centers from **19** countries

Deficits in PH infrastructure, staffing, and procedural volume in PGHN training centers limit training opportunities in PH
